Description

The commune of Saint-Malo is located in northeastern Brittany, on the English Channel coast and on the right bank of the Rance estuary. It is 18 km north of Dinan, 75 km north of Rennes and 404 km from Paris. Saint-Malo forms the northwestern part of the Clos Poulet, a broad peninsula bounded by the Rance, the English Channel and the Châteauneuf depression. At the northeastern end of the Clos-Poulet lies Cancale, which closes off the Mont-Saint-Michel bay to the west. The Clos-Poulet coastline is part of the Emerald Coast, which stretches from Cancale to Cap Fréhel. The neighboring communes of Saint-Malo are Saint-Coulomb to the northeast, Saint-Méloir-des-Ondes to the east, Saint-Jouan-des-Guérets to the southeast and south, and Dinard, La Richardais and Pleurtuit to the southwest and west, on the left bank of the Rance.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
