Lac de Cleuson

Water · Switzerland

GPS coordinates	46.11072, 7.32218
Elevation	2,171 m
Maximum height	100 m max
Access	On foot > 1,000 m
Nearest aerodrome	Altisurface du Glacier de Prasfleuri 5.7 km SE · spot 968 m lower
Spot reference	307721

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Sion Airport	Airport	12 km N	482 m
Altiport du Glacier de Tsanfleuron	Aerodrome	24 km N	2,696 m

Description

This reservoir lake is dazzling with the turquoise blue color of its water. The dam is 85 m high and holds back 20 million m3 of water. The walk up to the top of the dam is easy and can be done with children. For more information about this place, I recommend checking out the Nendaz Tourist Office website: https://www.nendaz.ch/fr/P72780/barrage-de-cleuson For any other questions, feel free to send me an e-mail, I would be happy to help you: alexandrone98@yahoo.com

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=307721

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.

My flight notes

Information sheet generated by Drone-Spot from community data: it replaces neither official aeronautical information nor the regulations. The remote pilot remains responsible for the flight.
