Forcalquier, Les Mourres

Unusual · Alpes-de-Haute-Provence

GPS coordinates	43.97741, 5.77947
Elevation	657 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Altisurface de Banon 15 km NW · spot 478 m lower
Spot reference	307761

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:08	07:39	17:06	17:38	9 h 26	07:39–08:24 · 16:21–17:06
Sun 22 Nov	07:09	07:41	17:05	17:37	9 h 24	07:41–08:26 · 16:20–17:05
Mon 23 Nov	07:10	07:42	17:05	17:36	9 h 22	07:42–08:27 · 16:20–17:05

Saint Martin de Castillon	Aerodrome	23 km SW	335 m

Description

Geological curiosities in Forcalquier The Mourres formations are spectacular masses of limestone with unusual shapes, several meters high, spread across a vast plateau landscape gently sloping to the southeast. The word Mourre means "muzzle" in Provençal. The curious Mourres formations are made of massive, slightly chalky limestone, locally containing gastropod shells. Originally embedded in beige marl, they are most often exposed by erosion and take on 5 types of picturesque shapes: undulations, mounds, haystacks, cylinders and basins. A lake origin The rocks that now make up the Mourres were formed in a lake environment about 25 million years ago. They are thought to originate from the stabilization of a limestone sediment by seagrass-like beds. More recently, differential erosion exposed the structures consolidated by algal constructions. The spectacular basin shapes are thought to …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
