Base Hydro-ULM "Henri Fabre"	Seaplane base	2.9 km SE	0 m
Berre/Marignane Seaplane Base	Seaplane base	13 km E	2 m
Marseille Provence Airport	Major airport	13 km E	23 m

Description

Figuerolles beach is a long beach straddling the communes of Martigues and Saint-Mitre les Remparts. It is very beautiful because it backs onto a large natural area (Conservatoire du Littoral on the Saint-Mitre side). You have to walk a long way (or go by mountain bike or horse...) to reach it, unless you take the little train that leaves from an entrance of the "Grand Parc de Figuerolles" (a landscaped park) or, of course, a boat. Despite its respectable "family" attendance (thanks to the little train), this beach is not supervised, which is a deliberate choice. However, since June 2017 it has been included in the GIPREB summer bacteriological checks. Since 2016, it has been very quickly colonized by eelgrass, a plant long awaited for the good ecological health of the lagoon.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
