Massif Ste Victoire

Mountain · Bouches-du-Rhône

GPS coordinates	43.52510, 5.56234
Elevation	343 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Pays d'Aix Medical Center Heliport 9.7 km W · spot 121 m higher
Spot reference	308000

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:08	07:39	17:08	17:39	9 h 29	07:39–08:23 · 16:24–17:08
Sun 22 Nov	07:09	07:40	17:07	17:39	9 h 27	07:40–08:25 · 16:23–17:07
Mon 23 Nov	07:10	07:42	17:07	17:38	9 h 25	07:42–08:26 · 16:22–17:07

Aerodrome	Type	Distance	Elevation
Pays d'Aix Medical Center Heliport	Heliport	9.7 km W	222 m
Aix - Les Milles Airport	Aerodrome	16 km W	112 m
Nord Heliport	Heliport	23 km SW	187 m
Saint Suffren private UL strip	Aerodrome	24 km NW	270 m

Description

The Sainte-Victoire mountain, called Mont Venturi in Provençal under the classical norm or Mount Ventùri under the Mistralian norm, is a limestone massif in the south of France, in the Provence-Alpes-Côte d'Azur region. Located east of Aix-en-Provence, it gained international fame partly thanks to the sixty or so works by the painter Paul Cézanne that depict it. It welcomes many hikers, climbers and nature lovers, and it is a major feature of the Aix landscape. The Sainte-Victoire massif stretches 18 kilometers long and 5 kilometers wide10, running strictly west to east. It lies in the Bouches-du-Rhône and Var départements, across the communes of Puyloubier, Saint-Antonin-sur-Bayon, Rousset, Châteauneuf-le-Rouge, Beaurecueil, Le Tholonet, Vauvenargues, Saint-Marc-Jaumegarde, Pourrières, Artigues and Rians. The D 10 and D 17 (Route Cézanne)11 are the main roads running along the massif. …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
