Puimoisson Airfield	Aerodrome	22 km NE	769 m

Description

Lake Quinson is a reservoir lake located in the Var, in France. It is formed by the Gréoux dam on the Verdon, which came into service in 1967 and lies more than 13 kilometers downstream. Geography Lake Quinson serves as the boundary between two departments, the Var and the Alpes-de-Haute-Provence, and between two municipalities, Quinson (04) and Montmeyan (83). Road access is mainly via the D13 departmental road. History The site has been known and inhabited since prehistoric times. Excavations in the Baume-Bonne cave have uncovered a rich collection of objects from that period, now kept at the Prehistory Museum of Quinson. Economy As along the whole course of the Verdon, the economy of Lake Quinson is mainly focused on tourism. The Quinson water sports center is one of the starting points for visiting the Verdon gorges by water, with electric boat rentals.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
