FLIGHT CARD

Generated on 21 November 2026

Ensuès la Redonne, calanques des Anthénors

Water · Bouches-du-Rhône

GPS coordinates	43.33101, 5.20517
Elevation	21 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Marseille Hydro 12 km E · spot 21 m higher
Spot reference	308201

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Nord Heliport	Heliport	14 km NE	187 m

Description

The calanque des Athénors in Ensuès la Redonne lies between the port of La Redonne and the calanque des Figuières. The beach is made of pebbles in a setting of cliffs typical of the Côte Bleue. The water is very clean, but you should bring swimming shoes because of the sea urchins. A few naturists can be found at the far end of the beach. There are two ways to reach this calanque. For the first, park at the port of La Redonne, then take the path that climbs on the right. Another option is to head toward Méjean from La Redonne, then park at the side of the road at the top of the first climb. A path leaves on the right and leads to the calanque.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
