FLIGHT CARD

Generated on 21 November 2026

Baou de la Gaude (796 m) & Baou de Saint-Jeannet (802 m)

Mountain · Alpes-Maritimes

GPS coordinates	43.75100, 7.13817
Elevation	765 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Hôpital L'Archet 2 Heliport 9.2 km SE · spot 579 m higher
Spot reference	308232

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour

Nice-Côte d'Azur Airport	Major airport	12 km SE	4 m
Sophia Antépolis Heliport	Heliport	17 km SW	235 m

Description

Baou de la Gaude (796 m) & Baou de Saint-Jeannet (802 m) - Côte d'Azur - Drone 4K/UHD - 2021 This village in the hinterland of Cagnes sur Mer, in the Alpes-Maritimes, is well known for its character and its baous (from Provençal: steep rock). The Baou de Saint Jeannet (802 m) is the best known. The Baou de la Gaude is right next to it. At its summit (796 m) are the remains of a Ligurian oppidum. From up there you look out over the whole Côte d'Azur! A nice hike up the Baou: Head to Saint-Jeannet, which is 20 km from Nice. Drive up to the village (about 400 m altitude) and park in one of the car parks at the entrance to the village. Follow the GR 51, which rises between the Baou de Saint Jeannet on the left and the Baou de la Gaude on the right.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
