Description

Capo Coda Cavallo - San Teodoro - Sardegna - Drone 4K/UHD - 2021 Capo Coda Cavallo is a strongly tourist-oriented locality in the municipality of San Teodoro, in the province of Sassari, and forms the extreme tip of the Sardinian mainland facing north toward the Tyrrhenian Sea, stretching out toward the islands of Proratora, Molara and Tavolara. Besides the splendid view of the islands, the beach at Capo Coda Cavallo boasts clear water and very fine sand set in the Mediterranean scrub. The small peninsula is part of the Tavolara-Punta Coda Cavallo Marine Protected Area and has coves and cliffs surrounded by vegetation of strawberry tree, juniper and mastic. The bay of Capo Coda Cavallo is bounded to the north by the limestone walls that make up the aforementioned islets, while all around there are panoramic residences and private villas built in Sardinian stone, perfectly blended into …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
