Description

Spiaggia Sa Capannizza - Pineta Sant'Anna - Budoni - Sardegna - Drone 4K/UHD - 2021 Sa Capannizza is a small stretch of beach that belongs to Spiaggia di Budoni and forms its southern end. The shore, of medium-grain sand, is flanked by a dense pine wood. The scenery is similar to that of the neighboring beaches: in the distance you can see majestic granite rocks and the lush vegetation typical of the Mediterranean scrub. The sea is clear and fairly sheltered from the wind. The seabed is shallow and mostly rich in rocks, which encourage visitors to try snorkeling. The only drawback of the little Sa Capannizza beach is the presence of posidonia, which covers part of the shore and the water. It does, however, indicate that the sea is clean, and it is often carried out to open water by the sea breeze that characterizes all of Sardinia.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
