Lac de Sainte-Croix - Les Salles-sur-Verdon

Water · Var

GPS coordinates	43.77227, 6.20785
Elevation	508 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Puimoisson Airfield (LFTP) 11 km N · spot 261 m lower
Spot reference	308240

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour

Description

Lac de Sainte-Croix - Les Salles-sur-Verdon - Gorges du Verdon - Drone 4K/UHD - December 2021 The project of flooding the Salles valley to create a lake is nothing new. In 1908, Georges Clemenceau, then President of the Council, set out on a donkey-back trek along the whole course of the Verdon between Fontaine-l'Évêque and Lac d'Allos: even then, they were considering developing the Verdon and building dams at certain strategic points along its course. The project was put on hold because of the twists of history, without being completely abandoned. Between the two wars, the Schneider company was in charge of building the dam, which remained only a project. Events moved quickly from 1962. The chosen project was to create a "big lake" up to the 500 level. Besides Les Salles-sur-Verdon, located at the bottom of the valley, it would have flooded the village of Bauduen, while …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
