Mont Vial (1550 meters)

Mountain · Alpes-Maritimes

GPS coordinates	43.89574, 7.14757
Elevation	1,509 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Hôpital L'Archet 2 Heliport 23 km S · spot 1,324 m higher
Spot reference	308255

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Hôpital Lenval Heliport	Heliport	24 km S	35 m

Description

Mont Vial (1550 meters) - Côte d'Azur - Drone 4K/UHD - September 2021 Mont Vial sits on a ridge line that, running through the Cime des Collettes and Mont Brune, separates the Var and Estéron valleys. At an altitude of 1550 m, it towers 1400 m above the Var Valley. From its summit, the view is breathtaking, both to the south, with the sea and Corsica beyond, and to the north, with the peaks of the Mercantour massif and the Argentera. The best-known route to Mont Vial is an out-and-back hike starting from Revest-les-Roches via the Col du Serce. This hike is more varied because it is done as a loop, following the Crête du Vial on the way up, which offers a beautiful view, and crossing its spectacular south face on the way back.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
