FLIGHT CARD

Generated on 21 November 2026

Zuydcoote Battery

Heritage · Nord

GPS coordinates	51.06163, 2.44814
Elevation	13 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Centre Hospitalier Heliport 4.5 km SW · same altitude as the spot
Spot reference	308270

Spot location and restrictions (Drone-Spot map image)

Dunkerque – Les Moëres Airfield	Aerodrome	7.5 km E	-1 m
Koksijde Air Base	Airport	15 km E	6 m
Sint-Augustinus heliport	Heliport	16 km E	4 m

Description

Leffrinckoucke beach on the Opal Coast, in the heart of the Dunes de Flandre. Located between the seaside resorts of Malo les Bains, very close to Dunkerque, and Zuydcoote. The Zuydcoote battery, also called the East battery, is a work of the Séré de Rivières system, built from 1877 to 1878 as an annex to the Fort des Dunes. It is named so because it was tasked with defending the Zuydcoote pass. Located in the municipality of Leffrinckoucke, 5 km east of Dunkerque, it is built entirely of yellow brick. The work was integrated into the Maginot Line, then supplemented with blockhouses of the Atlantic Wall. Parking nearby.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
