Description

Cap Taillat - Saint-Tropez Peninsula - Côte d'Azur - Drone 4K/UHD - January 2022 Cap Taillat is one of the natural gems of the Saint-Tropez peninsula. Nestled between Cap Lardier and Cap Camarat, it stands out in particular for its remarkable sandy isthmus. A true green lung, it offers visitors more than 2.5 km of maintained coastal path lined with magnificent, lush vegetation. Trails also lead into the interior of the massif, where you can discover a private vineyard and a megalithic burial site (Dolmen de Briande). On the coast, the Maison des Douanes shows off its 8 cells, fully restored in 2011 thanks in particular to the support of the PACA Region and the Fondation Banque Populaire. An information center for the public, it also hosts temporary exhibitions. Protected under the 1930 Law on landscapes, Cap Taillat offers, from its summit, grand views of the two other capes, as well as …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
