FLIGHT CARD

Generated on 21 November 2026

Peïra-Cava - Lucéram

Water · Alpes-Maritimes

GPS coordinates	43.92080, 7.36010
Elevation	1,454 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Casa del Mare Helipad 20 km SE · spot 1,449 m higher
Spot reference	308290

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Avenue Douine Heliport	Heliport	21 km SE	44 m

Description

Peïra-Cava - Lucéram - Côte d'Azur - Drone 4K/UHD - January 2022 Peïra-Cava is overlooked by its namesake summit at an altitude of 1,581 m. Located on a ridge separating the valleys of the Bévéra, the Vésubie and the Paillon. Its fairly gentle terrain, with numerous flat areas, makes it an unusual site for a village perched at 1,450 meters of altitude. The village thus offers many viewpoints over the Alps, the Mercantour and Esterel massifs, all the way to the Mediterranean Sea with the Lérins islands, and an exceptional glimpse of Corsica in very clear weather.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
