Col de Turini - Cime de la Calmette - 1786 meters

Mountain · Alpes-Maritimes

GPS coordinates	43.97005, 7.38750
Elevation	1,772 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Casa del Mare Helipad 24 km S · spot 1,767 m higher
Spot reference	308297

Description

Col de Turini - Cime de la Calmette - 1786 meters - Côte d'Azur - Drone 4K/UHD - January 2022 The Col de Turini is a mountain pass in the south of the French Alps. It links Lantosque, in the Vésubie valley, to Sospel, in the Bévéra valley. It also provides access to the Paillon valley and the towns of L'Escarène and Lucéram. Rising to an altitude of 1,604 meters, it is located near the summit of the Authion massif. The pass lies between the communes of Moulinet and La Bollène-Vésubie. There is a hamlet at the pass, where three main roads converge. A fourth road leads to Camp d'Argent, where there is a winter sports resort, and beyond to the summit of the Authion (Pointe des Trois-Communes). The Cime de la Calmette is a summit in the French Alps that peaks at 1786 m of altitude and rises about 200 m in elevation above the Col de Turini, in the Alpes-Maritimes department. It was accessible …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
