Coaraze - Mont Férion - 1412 Meters

Mountain · Alpes-Maritimes

GPS coordinates	43.86818, 7.27273
Elevation	1,400 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Princess Grace Hospital Helipad 19 km SE · spot 1,297 m higher
Spot reference	308317

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Hôpital L'Archet 2 Heliport	Heliport	19 km S	185 m

Description

Coaraze - Mont Férion - 1412 Meters - Côte d'Azur - Drone 4K/UHD - January 2022 It reigns supreme over the territory of Levens. At an altitude of 1412 meters, it is the second highest summit in the whole canton of Levens, just after the Cime de Roccassièra (1501 meters). A lookout tower for forest fire surveillance stands at the highest point, which means hikers can enjoy a sweeping panorama of the Mercantour massif range, including the main border peaks of the Vésubie area, as well as plunging views over the villages of Coaraze and Levens.

Scan to open the up-to-date spot page: weather, map and restrictions.
https://www.drone-spot.tech/en/fiche-spot.aspx?id=308317
Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
