FLIGHT CARD

Generated on 21 November 2026

Saint Michel du Frigolet Abbey

Heritage · Bouches-du-Rhône

GPS coordinates	43.85952, 4.72864
Elevation	99 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Centre Hospitalier Heliport 8.8 km NE · spot 78 m higher
Spot reference	308371

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Le Mazet De Romanin Airfield	Aerodrome	17 km SE	118 m

Description

Located north of Tarascon, the abbey of Saint Michel du Frigolet is nestled between valleys in the Bouches du Rhône. At the beginning of the 12th century, a community of canons settled here to found the abbey we know today. Despite the turmoil of history, it still stands today. Still inhabited by this congregation, it holds masses regularly, and tours of the site take place on Sundays at 3 pm. Enjoy the video.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
