Puy de Tourrettes - 1268 Meters - Côte d'Azur

Mountain · Alpes-Maritimes

GPS coordinates	43.74187, 7.02925
Elevation	1,266 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Sophia Antépolis Heliport 13 km S · spot 1,030 m higher
Spot reference	308468

Hôpital L'Archet 2 Heliport	Heliport	17 km E	185 m

Description

Puy de Tourrettes - 1268 Meters - Côte d'Azur - 4K/UHD Drone - February 2022 In the heart of the middle country of the Alpes-Maritimes, overlooking the Gorges du Loup, Courmes is the starting point for a traverse of the Puy de Tourrettes, which it makes sense to combine with the Pic de Courmettes. The hike follows the old Saint-Barnabé path that once linked the villages, to reach the Clapière Rousse. A pleasant ridge route follows, offering all the way to the summit a clear view over the vast surrounding landscape: Montagne du Cheiron, Plateau de Calern, Côte d'Azur, etc. The steeper descent from the Pic de Courmettes, via its west ridge, joins the GR51 trail, which makes for a pleasant return to the starting point.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
