Description

Aigues-Mortes, in Occitan Aigas-Mòrtas, in Provençal Aigua Morta, is a French commune of the Petite Camargue, located at the southern tip of the Gard department, in the Occitanie region. It is renowned for its ramparts and its arena, called the Plan des Théâtres and used for Camargue bull races, and is also sadly famous for the Massacre of the Italians that took place in August 1893. The commune's architectural heritage includes three buildings protected as historic monuments: the Hôtel de Grailhe, listed in 1994, the chapel of the Château de Roquelaure, listed in 2007, and four houses, registered in 1903, 1949 and 1993 respectively. The Salins d'Aigues-Mortes, which operate the Peccais marsh, emblematic of Camargue salt production, are also located within the commune. Its inhabitants are called Aigues-Mortais and Aigues-Mortaises, and aigamortencs in Occitan. The commune's territory is …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
