Tête du Garnier - Tête de Charnaye - Beuil - Côte d'Azur

Mountain · Alpes-Maritimes

GPS coordinates	44.10724, 6.96310
Elevation	1,902 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Altisurface de Valberg 1.8 km W · spot 1,219 m higher
Spot reference	308580

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

Tête du Garnier - 1906 meters and Tête de Charnaye - 1972 meters - Beuil - Côte d'Azur - Drone 4K/UHD - March 2022 From the Tête du Garnier, which peaks at 1906 meters, the panorama is beautiful, especially over the impressive southwest ridge of Mont Mounier, the nearby mountains (Tête de Charnaye, Tête du Pommier and the Cluots, Cime du Raton, Tête de la Colombière, Cime du Pra, Dôme du Barrot) and, further away, the peaks of the Mercantour. The Tête de Charnaye and the Chastellan: • Head onto the track leading to la Colle, passing the Mercantour National Park signs. You can see hedges, the boundaries of former hay meadows, as well as the shrike and the quail, the last witnesses of this bygone rural life. • Turn left at marker 8, then at the small pass behind it, turn left again across the fields on a fairly steep climb toward a water intake. The trail reaches the larch trees, following …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
