| Altisurface de Valberg | Aerodrome | 11 km S | 683 m |
| Altisurface d'Isola 2000 | Aerodrome | 18 km E | 2,500 m |

## Description

Col du Blainon - 2014 meters - Auron - Côte d'Azur - 4K/UHD drone - March 2022 Auron is a winter sports resort, created in 1937 and located at 1,600 m of altitude, in the municipality of Saint-Étienne-de-Tinée, in the Alpes-Maritimes department and the Provence-Alpes-Côte d'Azur region. Its inhabitants are called the Auronais. This former alpine pasture village of the Haut Haut Pays niçois, once the wheat granary of Saint-Étienne-de-Tinée, is today a lively winter and summer resort, about 1h30 by road from Nice, in the heart of the Mercantour massif, close to the national park of the same name. The highest and closest peak to the resort is the Cime de Las Donnas, peaking at 2474 meters of altitude. The ski area ranges from 1,250 meters to 2,450 meters of altitude and spreads over 135 kilometers of slopes, making it the largest in the Alpes-Maritimes department.

**Scan to open the up-to-date spot page: weather, map and restrictions.**

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

# Preparing the flight

## Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

## Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

*Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.*
