Lacs des Millefonts - Valdeblore

Mountain · Alpes-Maritimes

GPS coordinates	44.11177, 7.18976
Elevation	2,243 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Altisurface d'Isola 2000 7.0 km N · spot 257 m lower
Spot reference	308719

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:03	07:34	17:00	17:32	9 h 25	07:34–08:19 · 16:15–17:00
Sun 22 Nov	07:04	07:35	16:59	17:31	9 h 23	07:35–08:20 · 16:14–16:59

Altisurface d'Isola 2000	Aerodrome	7.0 km N	2,500 m
Altisurface de Valberg	Aerodrome	20 km W	683 m

Description

Lacs des Millefonts - 2229 - 2375 Meters - Mont Pépoiri - 2674 Meters - Valdeblore - Côte d'Azur - Drone 4K/UHD - April 2022 Five lakes in a mountain setting: The Lacs des Millefonts are five glacial lakes located in the municipality of Valdeblore, in the Alpes-Maritimes. Like jewels set in a mountain case, they are tiered between 2229 Meters of altitude for the first lake and 2375 Meters for the fifth. These magnificent landscapes are nevertheless very accessible, thanks to a trail with a moderate elevation gain that starts from a parking lot: the Millefonts parking lot at 2040 Meters. The first lake on the route is Lac Petit which, contrary to what its name might suggest, is actually the largest of all! Very close by is a second small unnamed lake.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
