Description

The Saint-Honorat chapel, or Saint-Blaise Priory, is a Romanesque chapel located at the place called Les Petits Camps in Les Mées, in the French department of Alpes-de-Haute-Provence. The first mention of this priory is given by Bartel: a benefice or rural priory under the patronage of Saint Blaise in agro Mediarum, dependent on the mensa of the abbey of Boscodon. Féraud makes it the parish church of Plan-des-Mées. Abbayes et Prieurés also make it dependent on Boscodon, the Saint-Blaise priory of Palleirosc, dependent on Boscaudon. G. Barruol makes it a dependency of the Order of the Temple in the middle of the 13th century and describes it as follows: the church of this establishment, under the title of Saint-Blaise. According to a few brief records, this chapel was the parish church of Plan-des-Mées. This is what is stated on 9 November 1891 during a pastoral visit: rural chapel …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
