Estoublon, clock tower

Heritage · Alpes-de-Haute-Provence

GPS coordinates	43.94435, 6.17488
Elevation	565 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Puimoisson Airfield (LFTP) 8.4 km S · spot 204 m lower
Spot reference	308768

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

Probably a former stagecoach relay (its name is said to come from Establo, "small stable"), Estoublon has kept from its past a clock tower, listed as a historic monument, which overlooks the village with a pretty wrought-iron cage bell tower topped with an angel weathervane, and a 12th-century church whose apse is listed. Once parked in the lovely shaded car park, you may fall under the spell of this village nestled on a hillock, still rural and already adopted by city dwellers who have started renovating these magnificent old stones. It's easy to understand, as Estoublon has incredible charm, with its superb "river pebble" stone houses, its two tile-roofed wash houses, and its clean, quiet little streets. As surprising as it is picturesque, and giving off a pleasant feeling of intimacy, Estoublon will surely win you over. Don't leave without buying the AOC Haute-Provence olive oil from …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
