Marseille Provence Airport	Major airport	21 km W	23 m

Description

The Montaiguet massif, nicknamed "the hill of the Aixois"1, is a wooded massif in the Bouches-du-Rhône located between Aix-en-Provence, Gardanne and Meyreuil. 6 kilometers long and 3 to 5 kilometers wide, its altitude ranges from 150 to 346 m. Its surface area, about 20 km2, is made up of limestone plateaus bordered by cliffs, pine and oak woods, and vineyards or other plantations2. The massif suffered a major fire in August 20053. In October 2010, 1,500 m2 were burned. Since the fires, the vegetation has gradually turned into garrigue. The Arc forms its northern boundary south of Aix-en-Provence. It lies between the communes of Meyreuil, Gardanne, and Aix-en-Provence. This massif is very popular with residents of the surrounding communes (Aix-en-Provence, Gardanne, Luynes and Bouc-Bel-Air) for sports and for admiring the view of Mont Sainte-Victoire .Archaeology of the massif A path ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
