FLIGHT CARD

Generated on 23 November 2026

Marseille, Vallon Dol. 15th arrondissement

Water · Bouches-du-Rhône

GPS coordinates	43.35999, 5.39937
Elevation	263 m
Maximum height	50 m max
Access	On foot > 1,000 m
Nearest aerodrome	Nord Heliport 3.6 km NW · spot 77 m higher
Spot reference	308835

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Mon 23 Nov	07:10	07:42	17:08	17:39	9 h 26	07:42–08:26 · 16:24–17:08
Tue 24 Nov	07:12	07:43	17:07	17:39	9 h 24	07:43–08:27 · 16:23–17:07

Hôpital La Timone Heliport	Heliport	7.9 km S	42 m
Marseille Hydro	Seaplane base	8.0 km SW	0 m
Aix - Les Milles Airport	Aerodrome	16 km N	112 m

Description

The Vallon Dol reservoir is a storage basin created in 1973 in the hills of Marseille to supplement the drinking water supply of the Marseille area, traditionally provided by the Canal de Marseille. It is fed by water from the Verdon through two branches of the Canal de Provence. Its storage capacity is equivalent to twice the volume of water in the Vieux-Port of Marseille, which would be enough on its own to cover a week of the city's drinking water consumption...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
