Pays d'Aix Medical Center Heliport	Heliport	23 km S	222 m

Description

A village ranked among the "most beautiful villages of France" Ansouis is certainly one of the prettiest perched villages in the South Luberon! Located in the southern part of the Vaucluse department in the Provence-Alpes-Côte d'Azur region, Ansouis is a stone's throw from the Bouches-du-Rhône department. Only 12 minutes by car from Pertuis (8.25 kilometres), 40 minutes from Aix-en-Provence (31 kilometres) or 1 hour from Marseille (68.2 kilometres), this village is a must-see stop for anyone staying in the Luberon, between calm and delight. The listed village is part of the COTELUB community of municipalities and the Luberon Regional Natural Park. The village of Ansouis is equally distant from Marseille – Provence airport (Marignane) and Avignon Provence airport; allow a 50-minute drive. The nearest TGV station is Aix-en-Provence TGV; allow 47 minutes to reach this charming village by …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
