## Nearby aerodromes

| Aerodrome | Type | Distance | Elevation |
|---|---|---|---|
| St Crescent Heliport | Heliport | 5.5 km N | 9 m |
| Narbonne | Aerodrome | 9.0 km NE | 3 m |
| Lézignan-Corbières Airfield | Aerodrome | 22 km W | 63 m |

## Description

Dating from the 11th century, it is located south of Narbonne and is part of the Narbonnaise Regional Natural Park. The coast of the Aude remains fairly unspoiled today. Indeed, despite the construction of a few "new" seaside resorts in the 1970s, vast sandy expanses remain. For me, the mosaic of landscapes offers one of the most beautiful scenes in the region, with the lagoons, the sea, the mountains, the islands, the lagoon, the wildlife (350 bird species here), the canals... everything blends together, and mass tourism is far away. 12,000 ha is the size of these expanses between land and sea, between fresh water, brackish water and salt water. Several villages sit on the shores of the lagoons, including Bages and Peyriac de Mer. The main activity on the lagoons is still small-scale fishing: sea bass, sea bream, sole, mullet and above all... eel, the local star! Here it is cooked in a ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

# Preparing the flight

## Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

## Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

*Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.*
