FLIGHT CARD

Generated on 21 November 2026

Michelbach Dam

Water · Haut-Rhin

GPS coordinates	47.76016, 7.10991
Elevation	336 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Centre Hospitalier De Moenchsberg Heliport 18 km E · spot 6 m higher
Spot reference	312600

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:12	07:46	16:49	17:23	9 h 03	07:46–08:35 · 16:00–16:49
Sun 22 Nov	07:13	07:47	16:48	17:22	9 h 00	07:47–08:37 · 15:59–16:48
Mon 23 Nov	07:14	07:49	16:47	17:22	8 h 58	07:49–08:38 · 15:57–16:47

Nearby aerodromes

Aerodrome	Type	Distance	Elevation

Belfort Chaux Airfield	Aerodrome	22 km W	417 m
Mulhouse-Habsheim Airfield	Aerodrome	24 km E	240 m

Description

ZP00020 Michelbach Dam (68 Haut-Rhin) 4K quality video: https://youtu.be/r1vwC8Y_hd8 Compilation of the raw footage from my training session on May 9, 2022 with my Mavic 2 Zoom. Goals for the session: 1° Gain speed while avoiding obstacles. 2° Perform tracking shots in reverse. 3° A spiral ascent up to 120 meters at the end of the video. 4° Another try of the ActiveTrack function (I need to find a subject other than myself to follow! lol) Avoid the right bank until the end of June; many birds have chicks there!

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=312600

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
