The Sabatier headframe | Scarpe-Escaut Regional Natural Park

Heritage · Nord

GPS coordinates	50.40590, 3.50048
Elevation	22 m
Maximum height	60 m max
Access	Direct access by car
Nearest aerodrome	Valenciennes-Denain Airfield (LFAV) 9.3 km S · spot 28 m lower
Spot reference	312831

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Baudour Heliport	Heliport	25 km E	30 m

Description

A superb spot in the middle of nature to discover the nature park and the Sabatier headframe. As for the history: the Sabatier headframe is the last remnant of the dismantling of the Sabatier pit (1912-1980). It is an asymmetrical pyramidal headframe made of solid-web girders, with four struts (braces). It has two platforms for its two superimposed sheave wheels, six meters in diameter. In this deceptively peaceful setting, the imposing headframe reminds walkers that this wooded landscape was in fact entirely shaped by intense industrial activity. This structure is listed as a Historic Monument.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
