FLIGHT CARD

Generated on 21 November 2026

Niolon, the Erevine Calanque and the Jonquier Calanque

Water · Bouches-du-Rhône

GPS coordinates	43.33165, 5.23691
Elevation	1 m
Maximum height	50 m max
Access	On foot > 1,000 m
Nearest aerodrome	Marseille Hydro 9.7 km E · same altitude as the spot
Spot reference	312844

Spot location and restrictions (Drone-Spot map image)

Marseille Hydro	Seaplane base	9.7 km E	0 m
Nord Heliport	Heliport	12 km NE	187 m
Marseille Provence Airport	Major airport	12 km N	23 m
Berre/Marignane Seaplane Base	Seaplane base	13 km N	2 m

Description

The Erevine calanque on the Côte Bleue is located between the ports of Méjean and Niolon. For those in the know, it is the most beautiful cove on the Côte Bleue. The setting is sublime, with the Erevine islet on the right and a tower opposite. The only drawback to this magnificent picture is the Blue Train railway line right above it (but the bridge is pleasing to the eye). To get to this cove, you can start from Niolon or from Méjean. From either side, allow one hour of walking, but we prefer to start from the Grand Méjean port (a little less difficult). Some sections are strenuous. Be careful when going down into the calanque (many loose rocks and a steep slope). The Jonquier calanque is close to Niolon, under a viaduct of the Côte Bleue train. The crystal-clear Mediterranean shows magnificent colors there.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
