First hills of the Piège

Mountain · Aude

GPS coordinates	43.26603, 1.93355
Elevation	307 m
Maximum height	60 m max
Access	Direct access by car
Nearest aerodrome	Aérodrome de Castelnaudary-Villeneuve (LFMW) 5.2 km N · spot 139 m higher
Spot reference	312896

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:22	07:53	17:23	17:54	9 h 30	07:53–08:37 · 16:39–17:23
Sun 22 Nov	07:23	07:54	17:23	17:54	9 h 28	07:54–08:38 · 16:39–17:23

Base ULM du Sarrat	Aerodrome	19 km W	258 m
Renneville Heliport	Heliport	21 km NW	190 m

Description

Above the village of Fendeille, a high, flat spot with a breathtaking view over the Lauragais. From this point you can launch flights over the rugged landscape of this plateau edge, which is really the very first foothills of the Pyrenees. The maximum possible altitude is 100 meters, but since the spot is on a high point, there's no need to reach that height to get great thrills. The spot is accessible by car, but be careful, the track is... agricultural!

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
