FLIGHT CARD

Generated on 21 November 2026

The Saint Barnabé plateau

Unusual · Alpes-Maritimes

GPS coordinates	43.75626, 7.03637
Elevation	949 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Cipieres Alpes Dazur ULM 14 km W · spot 206 m lower
Spot reference	312934

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:02	07:34	17:02	17:33	9 h 27	07:34–08:18 · 16:17–17:02
Sun 22 Nov	07:04	07:35	17:01	17:32	9 h 25	07:35–08:20 · 16:16–17:01
Mon 23 Nov	07:05	07:36	17:00	17:32	9 h 23	07:36–08:21 · 16:15–17:00

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Cipieres Alpes Dazur ULM	Aerodrome	14 km W	1,155 m
Sophia Antépolis Heliport	Heliport	15 km S	235 m
Hôpital L'Archet 2 Heliport	Heliport	17 km SE	185 m
Hôpital Clavary Heliport	Heliport	17 km SW	168 m

Description

This vast bare syncline, with its sinkholes, its limestone pavements and its scattered oak groves, offers a soothing landscape, even if the harshness of the climate can sometimes be felt. Nestled between the rounded massifs of the Puy Subert to the north and the Puy de Tourettes to the south, the Saint-Barnabé plateau is indeed sheltered from maritime influences and opens wide to the west, letting in the mistral blowing straight from upper Provence. Along the way, you can admire the sun-bleached white limestone rocks and their extravagant shapes sculpted by the action of water and carbon dioxide, which sometimes give the Saint-Barnabé karst plateau a lunar look.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
