Description

ZP00039 Hartmannswillerkopf 05092022 First reconnaissance flight at daybreak on 5 September 2022. S1 Max height 120m Max distance 200 m radius VIDEO in 4K quality: https://youtu.be/mtHVxycStOQ Flight carried out with no public present in order to comply with regulations. SITE PRESENTATION: The Hartmannswillerkopf, renamed Vieil Armand after the First World War, is a pyramid-shaped rocky spur in the Vosges massif, towering 957 meters above the Haut-Rhin plain of Alsace. A national monument stands there in memory of the fighting that took place there during the First World War, especially in 1915. Indeed, located in a straight line 7 km from Thann and 6 km from Cernay, between which ran the line separating the part of Alsace that became French again as early as 1914 from the part retaken by German troops, the Vieil Armand was a strategic summit that was fiercely contested at the time. The …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
