Chambéry-Savoie Airport	Airport	18 km NW	237 m

Description

This small alpine lake lies at an altitude of 874 m in an idyllic setting. Lined with reeds, it has kept its charm and its wild side. Accessible in all seasons, it can be explored on a walk all the way around it. Swimming is prohibited. The Lac de la Thuile is also listed by the Bauges Massif Regional Natural Park as a major geosite of the Bauges massif. The site can be reached via the Combe de Savoie (the Col de Marocaz), from Chambéry through Saint Jeoire-Prieuré and/or Barby-La Ravoire, and also through the heart of the Bauges massif via the villages of Thoiry/Puygros. Parking is limited in this small mountain village. Please use the designated parking spaces and do not park outside them, as this could block access for emergency services in particular. For events, consider the organized shuttles or carpooling! Between lake and meadows. During your walks around the lake, you will …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
