Château du Haut-Koenigsbourg

Mountain · Haut-Rhin

GPS coordinates	48.24855, 7.34420
Elevation	677 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome d'Albé - Val de Villé 11 km N · spot 297 m higher
Spot reference	313357

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour

Description

Château du Haut-Koenigsbourg, Alsace /!\ WARNING: the castle is close to the eagle falconry! Always keep an eye on your drone (regulations) and be ready to avoid an attack by a bird of prey: this is their hunting territory. Indeed, a bird of prey approached my drone right after I took this photo. I was glad I had reviewed the avoidance tactics you can find on YouTube. I made 5 evasive maneuvers (sport mode on) before finding my drone near the landing point (which, by the way, is marked out and indicated by warning signs like a heliport for tourists), stuck between the castle and the forest: the bird of prey gave up because there was no longer enough space for its run-ups in a big circle around the drone. Techniques used: - crab flight (unexpected and loud in sport mode, which scares the bird of prey): because it was impossible to climb above 120m - while it circled to dive at the drone: …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
