Description

Hello everyone. I invite you to discover, in a cinematic flight, the Turzon estate, its stream and its canyon, above Saint Georges Les Bains, west of Saint Peray in the Ardèche, right next to Valence at golden hour, filmed with a DJI FPV drone. The flight starts from the ruins of the medieval Château de Saint-Marcel-de-Crussol. Flown in DJI FPV Sport Mode. Happy flying everyone, and feel free to subscribe to my channel and like this video. See you soon. The village is located in the Moyen Vivarais. The town center of Saint-Georges-les-Bains sits on a hillside, while the other hamlets, Blod, La Grange and Châteaurouge, are along the Rhône. It is part of the canton of La-Voulte-sur-Rhône and neighbors the communes of Charmes-sur-Rhône and Soyons. The largest town near Saint-Georges-les-Bains is Guilherand-Granges, located northeast of the commune, 10 km away. The Rhône flows through …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
