The Lac de Barterand in Pollieu

Water · Ain

GPS coordinates	45.79250, 5.74324
Elevation	304 m
Maximum height	60 m max
Access	Direct access by car
Nearest aerodrome	Lavours 2.4 km E · spot 70 m higher
Spot reference	313395

Belley - Peyrieu Airfield	Aerodrome	12 km S	225 m

Description

This natural lake, which looks a bit wild in winter and is a popular fishing spot for enthusiasts, takes on the feel of a little Côte d'Azur once the good weather arrives, with its swimming area. Swimming is supervised in July and August (paid beach). Paddleboarding and canoeing/kayaking are not allowed. A 7 km (2 h) walking trail goes around the lake and lets you admire along the way the legends of the Bugey carved right into the rock: Gargantua and La Vouivre. The Lac de Barterand was awarded the "ENS" label by the Département de l'Ain in 2017. True natural and scenic gems of the Département de l'Ain, the sites with the ENS label ("Espaces naturels sensibles", or sensitive natural areas) are managed to preserve the biodiversity they host and are developed for public access (except in cases where the environment is too fragile). Glacial in origin, the Lac de Barterand and the …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
