St Jean D'avelanne Airfield	Aerodrome	21 km NW	294 m

Description

The Cirque de Saint-Même, located at an altitude of 900 m, offers walkers landscapes of rare beauty. In a green setting, you can enjoy the coolness of three superb waterfalls overlooked by an impressive amphitheater of cliffs. The Cirque de Saint-Même is part of the Hauts de Chartreuse national nature reserve. It is characterized by thick layers of Urgonian rock where four waterfalls form (from top to bottom: Cascade des Sources, Grande Cascade, Cascade Isolée, Pisse du Guiers), overlooked by limestone cliffs 500 meters high. The water comes from underground springs of the Guiers Vif, the historic border between the Dauphiné and the Kingdom of Savoy, and now the boundary between the two departments of Isère and Savoie. You can relax and have a picnic in the large meadow of the Cirque. Two marked hiking trails start from the Cirque: - The back of the Cirque and the "Pisse du Guiers" ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
