Description

L'Île-de-Bréhat is a French commune located in the Côtes-d'Armor department, north of the Pointe de l'Arcouest in Brittany. It is made up of the Bréhat archipelago, excluding Île Maudez. It takes its name from the main island, called Bréhat, whose Breton name is Enez Vriad. L'Île-de-Bréhat belongs to the historic region of Goëlo. The commune is part of the canton of Paimpol (arrondissement of Saint-Brieuc). As it is an island, it can only be reached by boat and all travel on the island is on foot; allow a good 3 hours to walk around it. The boat leaves from L'Arcouest, which is the nearest embarkation quay and the only one operating all year round. It is located in the commune of Ploubazlanec. The companies "Sur Mer Bréhat" (April to September) and "Les vedettes de Bréhat" (year-round service) provide access to the island by a shuttle that crosses the Ferlas channel in about ten minutes …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
