Aérodrome de Chambéry Challes-les-Eaux	Aerodrome	13 km S	297 m
La Fullie	Heliport	14 km E	1,394 m

Description

The Belvédère du Revard is one of the most visited sites in Savoie. There are several good reasons for this: the site is easily accessible all year round, winter and summer, by car or by bus; it is completely free (except the panoramic restaurant, of course); and it is a naturally beautiful site offering an exceptional 360° panorama of the surrounding mountains, as well as of Lac du Bourget and the towns of Aix-les-Bains and Chambéry. Since 2013, three walkways installed above the void have offered thrills in addition to the panorama opening onto four successive valleys and Lac du Bourget spreading out in the foreground. One of the platforms has a glass floor, giving the impression of walking on thin air. Note that the parking lot is very small. On beautiful summer days, it is often full. The glass walkway is closed in winter. A glass orientation table lets you identify the Alpine peaks …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
