Jacqueline Falls - Saint Joseph, Langevin River

Water · La Réunion

GPS coordinates	-21.38327, 55.64505
Elevation	28 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Pierrefonds Airport (FMEP) 24 km W · spot 10 m higher
Spot reference	313568

Description

Located in the wild south, Jacqueline Falls is the last waterfall along the Langevin River before it empties into the Indian Ocean. It is a very beautiful waterfall that plunges into a large, lovely pool, and swimming there is pleasant all year round. The site is easy to reach. From the Marine Langevin parking lot, you walk up the river for about 200 meters. From the river mouth, a trail leads you there, and several pools are also good for a swim. The roar of the nearby ocean and the lush vegetation surrounding the river make the place both wild and wonderfully exotic. DANGER: be careful, because as with all the pools on the island, swimming is not supervised. Depending on the rainfall in the highlands, the river level can rise suddenly.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
