Route FV500

Mountain · Norway

GPS coordinates	59.04609, 6.65369
Elevation	628 m
Maximum height	120 m max
Access	Direct access by car
Spot reference	313682

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:51	08:40	15:59	16:48	7 h 19	08:40–10:00 · 14:38–15:59
Sun 22 Nov	07:53	08:42	15:57	16:46	7 h 15	08:42–10:04 · 14:35–15:57
Mon 23 Nov	07:55	08:44	15:55	16:45	7 h 11	08:44–10:07 · 14:33–15:55

Description

Head to the village of Lysebotn, where the narrow Lysevegen Fv500 road (closed in winter) winds up the east side of the fjord in 27 hairpin bends. That's nearly 900 m of elevation gain in less than 15 km! Once on the plateau, the road crosses a mineral, almost lunar landscape of tundra and granite, between rocky massifs and small mountain lakes, with a few sheep roaming about. There is no other sign of life for kilometers, apart from small piles of votive stones, similar to cairns... Absolutely striking.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
