Berre/Marignane Seaplane Base	Seaplane base	13 km N	2 m
Marseille Hydro	Seaplane base	14 km E	0 m

Description

In a natural cove with turquoise colors, this is the largest beach in the town, with a sandy part and a pebble part. It is partially reserved for sun loungers (private beaches). It is also a surf spot in winter. The Rouet beach is the largest beach in Carry-le-Rouet and therefore the busiest. Fully equipped with showers and restrooms, it has a lifeguard station in summer and is accessible and equipped for people with reduced mobility. It is a sandy beach that's very pleasant for children, who can wade a long way out and enjoy their favorite beach games or take swimming lessons given by lifeguards. A diving center nearby will take you to discover the underwater world of the Côte Bleue, or if you prefer to be out on the water, kayak rentals are available. Restaurants and bars are within easy reach of the beach, and those who like lounging in the sun in comfort can rent mattresses to make …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
