Carry le Rouet, the Calanque des Eaux Salées

Water · Bouches-du-Rhône

GPS coordinates	43.33291, 5.18622
Elevation	40 m
Maximum height	50 m max
Access	On foot > 1,000 m
Nearest aerodrome	Marseille Provence Airport (LFML) 12 km N · spot 18 m higher
Spot reference	313817

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Marseille Hydro	Seaplane base	14 km E	0 m

Description

The Eaux Salées calanque in Carry-le-Rouet lies east of the hamlet of Le Rouet. This large calanque is easy to recognize thanks to the viaduct that spans it. Even though access is fairly difficult (lots of stairs), it is very busy in summer. The wild setting is very pleasant, with a few rocks along the sides that kids enjoy playing on. Note that the beach is made of large pebbles. The calanque can only be reached on foot via an old mule track. Park near the Rouet beach, then take Avenue Calvet. At the intersection, take the street on the left that climbs uphill (a barrier blocks access for non-residents). Turn left at the first intersection and take the path to the right of the barrier (between the hedge and the metal fence). At the end, go down the stairs and follow the railway line for about 300 meters. At the viaduct, there are stairs leading down into the calanque.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
