With a DJI mini 3 pro drone

Unusual · Rhône

GPS coordinates	45.80517, 4.58128
Elevation	332 m
Maximum height	60 m max
Access	Direct access by car
Nearest aerodrome	Villefranche-Tarare Airport (LFHV) 13 km N · same altitude as the spot
Spot reference	313844

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:17	07:50	17:05	17:38	9 h 15	07:50–08:36 · 16:19–17:05
Sun 22 Nov	07:18	07:51	17:05	17:37	9 h 13	07:51–08:38 · 16:18–17:05
Mon 23 Nov	07:19	07:52	17:04	17:37	9 h 11	07:52–08:39 · 16:17–17:04

Aerodrome	Type	Distance	Elevation
Villefranche-Tarare Airport	Aerodrome	13 km N	328 m
Lyon Brindas Airfield	Aerodrome	14 km SE	317 m
Centre Hospitalier Heliport	Heliport	24 km N	233 m
Hôpital Edouard-Herriot Heliport	Heliport	24 km E	199 m

Description

Hello, I'm sharing this spot with you Flight access 100 meters maximum For the video on YouTube I had a small editing problem, which is why the quality is like this

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=313844

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.

My flight notes

Information sheet generated by Drone-Spot from community data: it replaces neither official aeronautical information nor the regulations. The remote pilot remains responsible for the flight.
