The Rocher du Saussois

Unusual · Yonne

GPS coordinates	47.56585, 3.64597
Elevation	128 m
Maximum height	50 m max
Access	Direct access by car
Nearest aerodrome	Aérodrome de Clamecy (LFJC) 18 km SW · spot 90 m lower
Spot reference	313964

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

Fly over the majestic Rocher du Saussois, located in the Yonne, in this stunning video captured by a drone. Discover this impressive natural rock formation that rises more than 60 meters. Enjoy the panoramic view over the Yonne valley and the beauty of the surrounding nature, with its steep cliffs, lush vegetation and crystal-clear water. This video offers you a unique, immersive experience, letting you see the Rocher du Saussois from a new angle, with spectacular aerial shots that will give you incredible thrills. Whether you are a hiking or climbing enthusiast or simply a nature lover, this drone video takes you on a memorable journey into the heart of the Yonne.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
