Description

The Punta de Teno drone spot in Tenerife is a magnificent place to fly a drone and capture spectacular footage. Located at the northwestern tip of the island of Tenerife, in Spain, Punta de Teno is a rocky headland with breathtaking scenery. When you fly your drone over Punta de Teno, you can enjoy an unobstructed view of the Atlantic Ocean and the steep cliffs lining the coast. The crystal-clear waters, unique rock formations and secluded beaches create incredible filming opportunities. The spot also offers a great variety of landscapes. You can fly over the sheer cliffs and admire the power of the ocean crashing against the rocks. You can also explore the green valleys and steep slopes covered in lush vegetation. Sunsets at Punta de Teno are particularly magical, with warm colors and striking reflections on the water. It is important to note that Punta de Teno is a protected nature …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
