Description

Discover the majesty of the Mirador Lomo Molino in Tenerife, captured from above with stunning drone footage! Get ready for an unforgettable visual experience as you fly over Tenerife's breathtaking landscapes from the Mirador Lomo Molino. This exceptional viewpoint, located at the top of a hill, offers a panoramic view of the sparkling Atlantic Ocean, the majestic mountains and the natural beauty of the island. Thanks to the technological prowess of drones, we were able to capture images of exceptional quality, letting you immerse yourself completely in the magic of Tenerife. You'll feel as if you're gliding above the steep cliffs, flying over the green valleys and getting closer to the towering peaks. Let yourself be amazed by the variety of landscapes stretching as far as the eye can see: from lush forests to golden sandy beaches, including picturesque villages and spectacular rock …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
